The Development of the Tri-State Women in Computing (TRIWiC) Website.

Bethanie Williams, and Jan Pearce. Computer Science Department, Berea College, Berea, Kentucky, 40404.

Abstract

The Tri-State Women in Computing Conference (TRIWIC) is a regional ACM-W Celebration of Women in Computing. TRIWIC brings together female technical women from Kentucky, great Cincinnati and beyond! This is an opportunity for women in these geographical areas to meet women in their fields and receive mentoring and leadership from senior women. In order to receive information about the conference users would need to easily access the information. Dr. Jan Pearce and I helped develop the website which is designed to bring 170 women from 10 colleges together to encourage women in technology. Through the use of FileZilla, Bootstrap, and JavaScript we were able to implement the design of the front-end layout. We built multiple tabs to make conference information more accessible to participants and updated all the material that would need to be available for the 2020 TRIWiC Conference.
